The VPN **Client** **uninstall** **script** uninstalls any previous command-line or GUI version of the VPN **Client** from your workstation.

To **uninstall** the VPN **Client** for **Mac** OS X

Step 1 Open a terminal window.

Step 2 Run the following command:

```
sudo /usr/local/bin/vpn_uninstall
```

Step 3 Enter your password

Step 4 You are prompted to remove all profiles and certificates.

- If you answer yes, all binaries, startup scripts, certificates, profiles, and any directories that were created during the installation process are removed.
- If you answer no, all binaries and startup scripts are removed, but certificates, profiles, and the vpnclient.ini file remain.
